

REMARKS

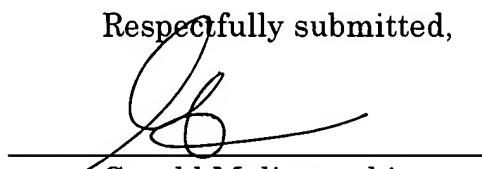

This preliminary amendment has been sent prior to any Office Action on the merits of the application. The amendment was filed to correct a typographical error. The application was unintentionally written using both the words "causal" and "casual". A previous preliminary amendment was written to replace the word "causal" with the word --casual--. Unfortunately, the previous preliminary amendment was incorrect. The word "casual" should have been replaced with the word --causal--. This amendment is written to correct the previous preliminary amendment. Because of the confusion with the previous preliminary amendment the Applicant believes that it would be simplest to replace the previously amended specification and claims with a substitute specification and claims. Attachment C is a version of the specification and claims showing the changes made. The Abstract was also amended to be less than 150 words. No new matter is being added through this amendment. Neither is the scope of the claims being altered.

A request to rescind the nonpublication request previously made under 35 U.S.C. 122(b) also accompanies this amendment.

It is believed that this application is now in a condition of allowance.

Respectfully submitted,

Date: 6/27/2002
